

November 2, 2022

Student Number: V00837207

Dear Parker,

Congratulations! You have been accepted into the Combined Major in Computer Science & Health Information Science at the University of Victoria effective January 2023 subject to signing and returning one copy of the Academic Program Agreement (indicating your agreement to the terms of enrolment). Please do this by emailing the School of Health Information Science at his@uvic.ca to indicate you have accepted this offer, and in your email state that:

“I accept the offer for admission to the School Health Information Science, and I have read the terms and conditions and agree to them”.

Please retain a copy of your email and the academic program agreement for your files. It is imperative that you email us your confirmation in order for you to be declared as a Combined Major in Computer Science & Health Information Science student.

Please find the following documents attached: Academic Program Agreement, Request to Change to CAPP (if applicable) and the Model Plan.

Students without grade 12 Biology are required to take one of EPHE 141/BIOC 102/BIOL 150A or BIOL 150B. If you have credit for Biology 12, this course can be replaced with an elective upon receiving written permission from the School. To request permission, please complete the attached Request for Change to CAPP Form and submit it to the Health Information Science (HINF) office via email to his@uvic.ca.

Health Information Science is a mandatory co-op program. The co-op work terms begin after you have finished the courses listed in the first two years on the model program. Remember – to be eligible for work term placement you must take a minimum of four courses each academic term and you must maintain a minimum GPA of 4.0 throughout all terms of your course of studies.

We understand that during these extraordinary times you may have questions. We encourage you to keep monitoring the return to campus for students [website](#) for updates and information regarding UVic’s response to COVID-19.

We know that you have many choices in pursuing a post-secondary education and congratulate you on your decision to study Health Informatics. We pride ourselves on having an open, welcoming office with staff and faculty who are here to assist you. We highly encourage you to email his@uvic.ca to set up an appointment to discuss course planning.

We look forward to having you in the program!

Sincerely,

Andre Kushniruk PhD, FACMI, FCAHS, FIAHSI
Director and Professor
School of Health Information Science
